

LAMPING TERMINOLOGY

FOR INFORMATIONAL PURPOSES ONLY; CONTENT MAY NOT REFLECT CURRENT PRODUCT OFFERINGS

WATTS

Amount of energy consumed by the bulb/panel

LUMENS

Measure of brightness that the bulb/panel puts out

KELVIN

Color temperature of the bulb/panel

LUMENS TO WATTS

BRIGHTNESS IN LUMENS	220+	400+	700+	900+	1300+
STANDARD	25W	40W	60W	75W	100W
LED	4W	6W	10W	13W	18W

This chart shows the general lumen output range for LED bulbs by wattage. Actual lumen output may vary, as it is influenced by several factors beyond wattage, including the bulb manufacturer, filament type, bulb shape, color temperature (Kelvin), and enclosure or finish (e.g., white, clear, frosted).
